

RILCO H-576

RILCO H-576 is a full synthetic metalworking neat oil that will perform multiple applications in any given production facility. Applications include screw machining, turning, grinding, hobbing, broaching and stamping amongst others. The complex blend of synthetic base stocks and advanced ester technology makes RILCO H-576 a single source neat oil for all applications. RILCO A-576 can be used on all metals without the fear of staining the “yellow metals”

BENEFITS:

- Low odor
- High Operator Acceptance
- Easy to clean
- Exceptional tool life
- Improved productivity
- Oxidative Stable

Typical Specifications	
Visc. @ 100f sus	40
Flash point f	340
Sulfur, chlorine	none
Color	Clear, slightly yellow
